Reg No : 145257-OPD

Date : 13/01/2026

Name : MRS. VIDHYA WAYAL

Age : 41Yrs/0M/0D

Ref.by : Dr.ANIRUDDHA TONGAONKAR

Sex : FEMALE

SONOGRAPHIC EVALUATION OF ABDOMEN AND PELVIS

Liver: It is normal in size. The parenchymal echotexture is normal. No focal lesion is seen. The hepatic arteries and veins are normal. The portal vein is normal in course and calibre.
Biliary tract: IHBR and hepatic ducts are not dilated. The confluence is normal.
The common hepatic duct and CBD are not dilated.

Gall Bladder: It is well distended. The lumen is clear. Multiple mobile echogenic calculi of 3-4mm are seen. The wall thickness is normal. The pericholecystic regions are clear.

Pancreas: Visualised portions are normal in bulk and echotexture. The MPD is not dilated.
The peripancreatic regions are clear

Spleen: It is normal in size and echotexture. The perisplenic regions are normal

Both kidneys and ureter:

Right kidney-10.8 x3.8 cm

Left kidney- 10.2 x4.8 cm

Normal cortical echotexture is seen with maintained CMD. No hydronephrosis or hydroureter is seen. Perinephric regions are normal

Urinary bladder: It is adequately distended. The lumen is clear. There is no calculus or mass lesion noted. The wall thickness is normal. The perivesical regions are clear.

Uterus: It is bulky. It measures 13.6 x9.6 x7.3cm. Large hypoechoic anterior myometrial fibroid is seen measuring 7.3 x5.6 x7.9 cm. No signs of degeneration or calcification are seen. Endometrium is displaced by posteriorly by it. The endometrial thickness is 7.9mm. The myometrial echotexture is normal. The endometrium is normal. The cervix is normal.

Bilateral ovaries: are normal in size

Right ovary-6cc

Left ovary-7cc

Bilateral adnexal regions are clear. No fluid is noted in cul-de-sac.

Bowel loops:

Visualised small and large bowel loops unremarkable. The ileo-cecal junction is normal.

Peritoneal cavity and Retroperitoneum:

Lymphadenopathy: not seen.

Ascites: Not seen.

Abdominal wall: No hernia is detected.

Vessels: Visualised abdominal aorta and its visualised branches are normal. Visualised IVC and its tributaries are normal.

IMPRESSION:

Cholelithiasis with no signs of cholecystitis.
Bulky uterus with large uterine fibroid.

Whole Abdomen Scan Report

- Liver** : It is normal in size, shape, position and echotexture. No evidence of focal lesion. No IIR dilatation. Portal vein and common bile duct appear normal in course and caliber.
- Gall Bladder** : Is distended. Multiple (7-8) mobile calculi noted, forming a cluster, approximate size is 4-5 mm. wall thickness appears normal. No pericholecystic fluid seen
- Pancreas** : It is normal in size and echotexture. No focal lesion seen.
- Spleen** : It is normal in size and echotexture. No focal lesion seen.
- Right Kidney** : are normal in size, shape, position and outline and shows corticomedullary differentiation.
No c/o calculus or hydronephrosis on either side.
- Left Kidney** : are normal in size, shape, position and outline and shows corticomedullary differentiation.
No c/o calculus or hydronephrosis on either side.
- Bladder** : Is well distended and normal. No evidence of intraluminal contents.
- Uterus** : Bulky, anterior wall more thickened than posterior wall (question mark like shape) and shows heterogeneous echotexture with increased myometrial vascularity. shows tiny myometrial cysts. Endometrial myometrial junction in obscured. Shows sub endometrial /myometrial vertical linear striations. Measures - 12.1 x 8.2 x 9.1 cm. Endometrium Thickness-It is completely obscured.
- Right Ovary** : Right ovary are normal in size and echotexture. No evidence of focal lesion.
Multiple follicles seen bilaterally.
- Left Ovary** : Left ovary are normal in size and echotexture. No evidence of focal lesion.
Multiple follicles seen bilaterally.
- Pouch of Douglas** : No free fluid seen in POD.

Impression

- Cholelithiasis without signs of cholecystitis.
- Asymmetric bulky uterus with above changes suggest adenomyosis.
- Rest is within normal limits.

ADV - MRI pelvis.
